INFORMED SPORT

WE TEST • YOU TRUST

KNOW YOUR RISK

Each year athletes have their careers ruined by inadvertent doping. Research has shown that up to 1 in 10 supplements sold on the market are contaminated with some form of steroid or stimulant prohibited by the World Anti-Doping Agency (WADA).

SAFEGUARD YOUR HEALTH, SAFEGUARD YOUR CAREER CHOOSE INFORMED SPORT CERTIFIED SUPPLEMENTS

ALL SPORTS SUPPLEMENTS ARE NOT CREATED EQUAL

Finding a supplement that athletes can trust is all about risk management. It's been proven that it is safer to take a supplement that has been through the Informed Sport programme,which ensures that the product has been routinely tested for banned substances and that it has been made to the highest quality standards, than to choose a product that has had no banned substance testing performed at all.

Since athletes are responsible for what they consume, getting this risk management process right, and finding a product that is not contaminated with banned substances, is crucial.

SEARCH FOR TESTED SPORTS SUPPLEMENTS AT INFORMED-SPORT.COM

The Informed Sport website allows users to search for tested supplements by searching by brand name, product type and batch number. The site is also mobile responsive for use on Apple and Android phones and tablets. With more than 1000 products certified globally, finding banned substance tested supplements has never been easier.
